## Chain Wrench

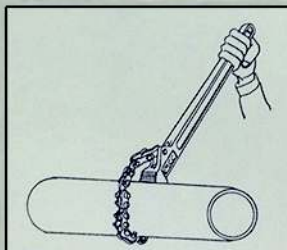

MADE IN JAPAN

### WARNING

- Read carefully before start using. Otherwise serious injury may be caused.
- Designed for plumbing & conduit pipe only. Never use on other type of pipe.
- Never apply an extension bar or pipe for leverage.
- Set a wrench straight and confirm the firm grip before turning. Otherwise it may slip and cause serious injury.
- Keep your working space clear and large enough for your step. When slip, unexpected accident or injury may be caused.
- When using upper ground, use Chain Wrench with safety harness to avoid falling.
- Cancer and Reproductive Harm- [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov)

### CAUTION

- Never try to modify Chain Wrench. Modification of tool may cause a serious accident or injury.
- Do not use Chain Wrench for bending pipes or holding pipes up in air or in upright position.
- Do not hammer Chain Wrench or use Chain Wrench as a hammer.
- Always check the condition of Chain Wrench and never use it when it's damaged or worn out.
